- 5) The colour indicates whether the fabric is recommended for your selected furniture. The recommendation categories are as follows:

**RECOMMENDED** = Covering conceived by the designer to go with the collection. This is the ideal choice for the creation of the product in both technical and aesthetic terms.

**SUITABLE** = Covering suitable for the model in both technical and aesthetic terms but not expressive of the philosophy of the product. Not to be used for display purposes.

**NEUTRAL** = Covering technically useable, but with not entirely satisfactory aesthetic results. Possible imperfections in the end result of the product.

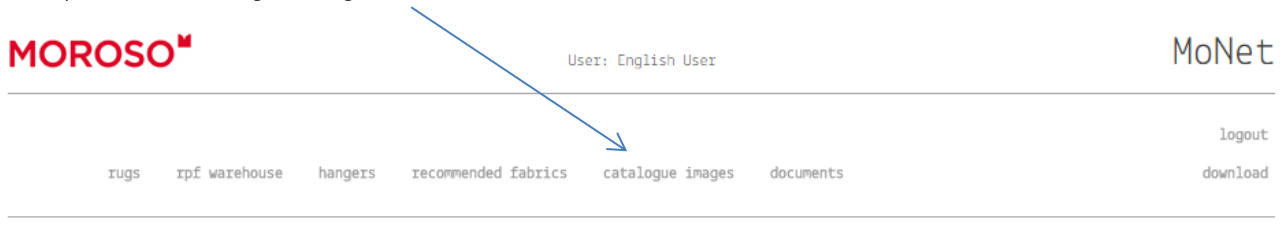

**NOT RECOMMENDED** = Covering to be avoided for this model for both technical and aesthetic reasons.

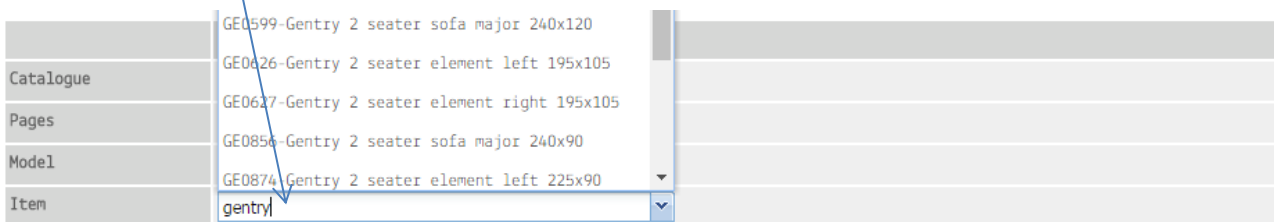

(\*) Indicates that there is an exception. The colour identifies where the exception is found. The individual fabrics and articles are written in *italics*.
